

stay far away from these:

The most dangerous part of a big ship, where the thrusters are, is marked with one of these symbols. The propellers here can suck you in or capsize you.

If you need help or rescue, in an emergency CALL
**Coast Guard Station
Cleveland Harbor
216-937-0140**

Other helpful contacts:
Ohio DNR Division of Watercraft

**YOU PADDLE THE CHANNEL
AT YOUR OWN RISK.
This pamphlet is only a guide.
The publishers accept no liability for
injury, death or damage to property.**

what to do

if you hear or see a ship approaching STAY ALERT

If you have a VHF Marine Radio (and you should,) monitor VHF CHANNEL 16 at all times.

- Only hail a large vessel in an emergency.
- State the name of the vessel you are calling.
 - If you don't have a radio, slowly and repeatedly raise and lower outstretched arms to each side.

PORT means "LEFT."
STARBOARD means "RIGHT."

GET OUT OF THE WAY!

Do not impede a large ship's passage. It has the right of way.

- **PADDLE TO THE NEAREST PASSING ZONE - SEE MAP.**
- **IF YOU CAN'T REACH A PASSING ZONE, KEEP CLOSE TO THE BANK.**
- **NEVER CROSS IN FRONT OF A COMMERCIAL VESSEL.**
- **TIGHTEN YOUR LIFEJACKET, PREPARE FOR VERY ROUGH WATER, and HANG ON.**
- **IF SOMEONE ON THE LARGE SHIP TELLS YOU WHERE TO GO, LISTEN! and FOLLOW THE INSTRUCTIONS.**

PADDLE SAFE

The Cuyahoga River is beautiful.

But the ship channel, where the river flows through the center of Cleveland, is a very dangerous place to paddle.

The freighters that come through every day are huge – as tall as a building and as wide as the river. The sideways propellers that steer them make giant waves that can capsize a canoe, kayak, or board. **And they can't see you.**

THINK

The channel is **23 FEET DEEP**, lined with STEEL WALLS, with very few places to escape or grab hold.

LOOK

Be aware of your surroundings and of other vessels. Know where you are and where the nearest passing zones are.

LISTEN

5 SHORT BLASTS OF A HORN mean **DANGER** - a ship is nearby.

LINK

Use smartphone apps to see what ships are in the area.

before you paddle...

- ☐ Check the weather.
- ☐ Always **wear** a lifejacket.
- ☐ Have lights on your vessel and turn them on at dusk.
- ☐ Charge the batteries on your phone, vhf radio and lights.
- ☐ Tie a whistle or air horn to your lifejacket to draw attention.
- ☐ Tell someone where you are going and when you'll return.
- ☐ Know how to reboard your vessel in deep water.

look up & link up

Before you go, check ship traffic websites like boatbeacon.com or marinetraffic.com to see if ships are in the vicinity or on the way. Use BOAT BEACON or MARINE TRAFFIC apps on your smart-phone while on the water. Note that Information may be delayed, so ships may be closer than they appear on the app.

How to paddle safely on the Cuyahoga River Ship Channel

The Cuyahoga River Ship Channel

- Red Lines = Danger Zones, do not stop when freighter is in the area
- Orange Lines = Passing Zones, least unsafe place to stop while freighter passes
